

Design Engineer – (Circuit Modelling & Design)

Experience

2+ years experience person in the domain of Analog/Mixed Signal Circuit Modeling and Design Solutions. Good hands on in circuit modeling and design with top level understanding of blocks like Amplifiers, DC-DC converters and other analog blocks is a must.

Role

Individual Contributor - Project execution, customer communication, self project management with focus on technical execution.

Responsibility

- Circuit modeling for blocks like Amplifiers, DC-DC converters etc
- Verification of all the blocks
- Project Management
- Customer Communication

Pre Requisites

* Hands on in

- + Circuit Design and Modeling
- + CMOS Circuit Design (90nm/65nm/45nm/40nm)
- + Verification and Validation

* Good knowledge of

- + Analog Blocks - Amplifiers, DC-DC converters
- + Circuit design and modeling techniques
- + PSpice and similar tools
- + Skill/C/Perl etc automation

Good to have Analog System Understanding

Posting is for Hubli location.
