

Senior Synthesis/DFT Engineer

Key Skills

- Good working experience on digital synthesis/DFT and expertise in Synthesis, STA and Formal Equivalence Checking.
- Working experience in scripting languages such as PERL, TCL etc.

Job Description

Need to execute the Synthesis/DFT (RTL-to-Netlist) for multi-million gate digital blocks for customers in Deep Sub-micron/Ultra-Deep Sub-micron technology nodes independently. Work will include highly challenging work in Synthesis, Static Timing Analysis and formal verification with an opportunity to work with industry experts on the state-of-the-art processes, tools and flows.

Education/Experience

- Bachelor's degree in Electronics.
- 3+ years of relevant experience.
- Be able to work in a start-up environment
- Knowledge of Ultra-Deep Submicron (UDSM) issues in digital backend
- Understanding of RTL design concepts
- Self-driven in learning and execution, Willingness to work hard and strong teaming skills.
- Good interpersonal skills

Location will be Hubli in Karnataka (Based on project needs, onsite at Bangalore for short durations)

Compensation & Benefits:

Attractive package will be offered as per industry practices.
